Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-7, drawn to coumarin analogs and their pharmaceutical compositions and method of use, classified in class 549, subclass 283 e.g..
- II. Claim 8, drawn to a method for selecting coumarin analogs for effective anti-coagulation therapy involving bonding to serum albumin classified in Class 435.
- III. Claims 9 and 10, drawn to coumarin analogs obtained by the method of the above group and an anticoagulant comprising said analog, classified in class 514, subclass 457.

The inventions are distinct, each from the other because:

The method of selecting coumarin analogs for effective anticoagulation therapy is neither the method of synthesizing or using them. It is thus independent and distinct. The above coumarin analogs are not obtained by the above method. They are selected.

Because of the above reasons and because the searches are different restriction as above is proper.

A telephone call was made to Mr. Schulman on 8-3-2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants must now elect a single species to which the claims would be limited in case no generic claim is found allowable.
